

• WHO SHOULD OPT FOR VAMPIRE WINGLIFT®? •

Women who seek to rejuvenate aging or deflated labia, women with wrinkled crepey labia, and women simply seeking to refresh the labia can all benefit from this procedure.

Vampire WingLift® is a great addition to a labiaplasty surgery for more overall rejuvenation. Juliet laser pairs perfectly with Vampire WingLift® to resurface and restore the labia using multiple anti-aging modalities.

• WHAT IS THE DOWNTIME/RECOVERY? •

No. There is no downtime or any long recovery process. You shouldn't wash or apply products for 6+hours. You may experience significant swelling and mild redness, discomfort and tightness from the injections for 1-2 days, which can be managed with an analgesic like Tylenol. This resolves within 48 hours, is mild, and is normal. It is best to avoid anti-inflammatory medications, NSAIDS, corticosteroids, aspirin, Advil, Aleve, Ibuprofen for at least 1 week following treatment. Avoid sauna use and vigorous exercise for 24 hours after treatment. Sexual activity is usually comfortable the day after treatment.

• WHAT IS THE COST FOR VAMPIRE WINGLIFT®? •

The cost of treatment is \$1200 or 3 treatments for \$3000.

• DOES INSURANCE COVER TREATMENT? •

No. Treatment is considered cosmetic and elective. Insurance does not cover this treatment cost.

Start by making an appointment with one of our practitioners for a thorough consultation.

Labial Rejuvenation
Discover the Power of PRP

RESTORE

Thanks to advances in aesthetic medicine and ground breaking research, this new technique combats intimate aging with ease and has impressed both patients and practitioners. **Vampire WingLift®** with Platelet Rich Plasma or PRP is showing impressive results in reversing aging and prompting healing.

WHAT IS VAMPIRE WINGLIFT®?

Vampire WingLift® is used to achieve natural looking results. This treatment offers rejuvenation to aging labia. During this non-surgical procedure, your own PRP is injected with a small needle into your labia and the growth factors work to naturally stimulate the growth of your tissue. This procedure has great potential to stimulate collagen, smooth crepey skin, plump deflated labia and reduce wrinkles. Also, it is a beneficial addition to surgical labiaplasty and Juliet labia laser treatment.

WHAT IS PLATELET RICH PLASMA (PRP)?

Platelets from your own blood contain growth factors, cytokines, and proteins that trigger cell repair and regeneration, rejuvenate tissue and stimulate stem cells for enhanced growth. This has lead different fields of medicine to utilize PRP for wound healing, to speed up recovery time and regrow healthier, stronger tissue.

WHY VAMPIRE WINGLIFT®?

Now there is an affordable way for you to improve aging, deflated labia without downtime. **Vampire WingLift®**, proprietary PRP treatment, works well to stimulate tissue and produces more youthful labia.

ADVANTAGES OF VAMPIREWINGLIFT®:

- Time Tested Proven Results
- No Downtime
- Safe & Effective
- Drug Free
- Short Treatment Time
- Natural Results
- Long-lasting anti-aging results

INTIMATE

BENEFITS OF VAMPIRE WINGLIFT®:

- Increases blood supply to the labia*
 - Increases collagen *
 - Triggers and maintains the growth of healthy tissue*
 - Smoothes rough, lifeless skin*
 - Decreases wrinkling*
- **WHEN WILL I SEE RESULTS?** •

Results and improvement are immediate and noticeable within days. Full results are achieved in 3 months.

HOW LONG DO THE RESULTS LAST?

The results of this procedure typically last 1-2 years, but this varies based on many factors. Results have been maintained without additional injections for longer in many patients.

HOW MANY TREATMENTS ARE RECOMMENDED?

1 treatment will deliver serious anti-aging. A series of 3 may be desirable to combat more severe aging. To maintain optimal results, we usually recommend 1 treatment a year to maintain the volume of the tissue.

THE PROCEDURE

This quick procedure involves the collection, concentration and application of your own platelets using a very easy three-step process.

STEP 1: The area is numbed for comfort during treatment.

STEP 2: A small sample of your blood is collected and is placed into a centrifuge to extract the highest concentration of PRP.

STEP 3: Using a very tiny needle, the PRP is then injected strategically into your labia in the areas that need improvement.

HOW LONG DOES THE PROCEDURE TAKE?

The blood collection, PRP extraction, and the application take less than 1 hour.

IS THE PROCEDURE SAFE?

Yes. It is a safe procedure without any common side-effects. PRP treatments are considered completely safe and natural as you are using growth factors from your own body with a sterile technique. So, there is almost no chance of blood infection or an adverse immune response.

IS THE PROCEDURE PAINFUL?

No. The area is numbed so treatment is comfortable and well tolerated. Some patients may experience temporary mild discomfort for hours after treatment.
